Event Security Risk Assessment

A free checklist provided by [Titan Security Europe](#)

Here is an event security risk assessment checklist:

General Information

- Name of the event:
- Date and time of the event:
- Location of the event:
- Type of event (e.g. concert, festival, political rally, etc.):
- Number of expected attendees:

Threat Assessment

- Identify any potential security threats or risks that may arise during the event, including:
  - Criminal activities (e.g. theft, vandalism, assault)
  - Terrorist attacks
  - Natural disasters (e.g. hurricanes, earthquakes, fires)
  - Medical emergencies (e.g. heart attack, injury, illness)
  - Technical failures (e.g. power failure, equipment failure)
- Assess the likelihood and impact of each potential security threat or risk.

Venue Assessment

- Evaluate the physical security of the venue, including:
  - Access points and perimeter security
  - Physical barriers (e.g. fences, walls, gates)
  - Lighting and visibility
  - Emergency exits and evacuation routes
- Assess the availability and accessibility of necessary resources, including:
  - Emergency services (e.g. police, fire, ambulance)
  - Medical facilities and first aid stations
  - Backup power supplies

Crowd Management

- Assess the potential for crowd management issues, including:
  - Overcrowding
  - Congestion at entry and exit points
  - Movement of people within the venue

- Evaluate the availability of resources to manage crowds, including:
    - Physical barriers (e.g. barricades, fencing)
    - Event personnel
    - Security personnel
    - Crowd control equipment (e.g. crowd barriers, signage)

Event Operations

- Evaluate the event operations plan, including:
    - Event personnel responsibilities
    - Emergency response procedures
    - Communication protocols
    - Medical support
    - Crowd management plan

Security Personnel

- Evaluate the security personnel plan, including:
    - Number and type of security personnel required
    - Roles and responsibilities of security personnel
    - Equipment and supplies for security personnel

Emergency Response

- Evaluate the emergency response plan, including:
    - Emergency response procedures
    - Communication protocols for emergency response
    - Availability of emergency services
    - Availability of backup resources (e.g. backup power supplies)

Post-Event Review

- Plan for a post-event review to evaluate the effectiveness of the security plan and identify areas for improvement.

This checklist is a starting point and should be tailored to the specific needs of each event. Event organizers should ensure that all necessary steps are taken to minimize the risk of harm and ensure the safety and security of all attendees at the event.
